Vega, TX

### START DATE

July 2018

### END DATE

October 2019

## SCOPE

- Full EPC contract of the installation of 87 each 2.3 MW Siemens turbines
- Full civil work
- Foundation, turbine, collection, substation and transmission line installation
- Construction of O&M building

## OVERVIEW

Canadian Breaks was a 200 MW wind project that was completed on schedule, had over 200,000 man hours and zero recordable injuries. The team battled through many weather challenges, including a few 90 mph wind events, extreme flooding and more. Despite difficulties posed by nature, the Canadian Breaks team pulled through to complete this successful project.
