September 2011

END DATE

December 2012

SCOPE

- Collection system
- Foundations
- O&M building
- Roads
- Substation
- Switchyard
- Tower Wiring
- Transmission line
- Turbine erection

OVERVIEW

Crews mobilized in the fall of 2011 to provide BOP construction services for this 101.2 MW wind farm located on 10,000 acres in the municipality of Santa Isabel on the southern coast of Puerto Rico. The project was the first wind farm on the island and employs 44 Siemens 2.3 MW turbines.
