

PROJECT PROFILE

Courtenay

LOCATION

Courtenay, ND

START DATE

August 2015

END DATE

March 2017

SCOPE

- Collection system installation
- Heavy/civil road
- Installation
- Substation
- Transmission line
- More than 150 miles of underground cable

OVERVIEW

Wanzek Construction, Inc. was hired as an EPC contractor to complete the construction of the Courtenay Wind Farm project. The 200 MW project consisted of 100 Vestas turbines, enough to power approximately 105,000 homes. The scope included the construction of all necessary roads, collection system, substation, transmission line and erection activities.
