

PROJECT PROFILE

Cottonwood Wind Farm

LOCATION

Webster County, NE

START DATE

May 2017

END DATE

November 2017

SCOPE

- Civil, foundations and collection
- Access road construction
- Collection system installation
- Wind turbine foundation concrete installation
- 5,000 SF pre-engineered metal office building/shop
- One meteorological tower

OVERVIEW

The Cottonwood Wind Farm was completed with over 99,000 labor hours, zero reworks and a satisfied client. This project is located just south of Blue Hill, Nebraska. The client worked with landowners to lease the agricultural land needed to construct the project. Cottonwood consists of 36 GE 2.3 MW and 4 GE 1.79 turbines, which reached a hub height of 80 meters, producing 90 MW of power.
